

July 2013

I just finished my orthodontics treatment with Dr. Murthy. I am extremely happy I will be able to have a beautiful smile before my 30th birthday. Yes, I started my treatment when I was 26 since I was travelling a lot during my education years and I didn't want to commit for the treatment when I was always on the move. Although it took a long time to start with the treatment, I have no regrets. My smile is beautiful and now I have different pose when it comes to photos!

I only met with Dr. Murthy regarding my treatment, I didn't need to see other doctors because my first impression with Dr. Murthy was outstanding (and this comes from someone who had a traumatic dental experience when she was 5 years old so I am very picky whom I choose for my dental work). Dr. Murthy always explained what needed to be done for the visit and why. He was always very professional, as well all his staff, Janine and Heather. It was always a delight to be greeted by Heather, we had a couple of good conversations. J was always attentive to my concerns and always did a fantastic job. I would totally recommend Dr. Murthy and his practice and if my brother comes to Boston to live, he will go directly to Dr. Murthy to start with his treatment!

Thank you so much Dr. Murthy,
and Heather!
