Dear Dr. Murthy, Heather and Jeannine,

Thank you again and again for helping me through over two years of orthodontics and all of the fun that comes with it. When I was asked about my braces by friends and strangers, I would do whatever I could to make sure they understood I was being helped and fixed by the most skilled and most genuinely nice people in Boston. I looked forward to every visit, even when I knew it was a long time before anything was finished. Every question was answered and explained clearly for me, and I can't believe how patient I became because you were so patient with me.

When I first visited Dr. Murthy's office, I had an open bite that most likely required removing teeth, surgery and plenty of steps to fix my crooked parts. He made sure I understood the entire picture and what to expect, and I followed everything I could that he asked of me, except that I should always have flossed more. The smile and bite I started with were uncomfortable and I had trouble eating almost anything. Thanks to you, I can't stop smiling, and no food is an obstacle anymore.

If anyone I meet needs help with their bite, or needs to just learn the health of their bite, or just wants to meet the nicest team of people I know, you're the first and only place I'll say to visit. I was incredibly lucky to be your patient and I'll help anyone I meet in the future to be as lucky in finding you.

Ben
